

Part I (due at the beginning of class Friday, September 26)

Complete pages 1 and 2 (front and back of the first page) of the Intermediate Value Theorem handout. You won't turn this in on Friday, but I'll walk around to make sure that it's done and we'll discuss it as a class.

Recall, what you turn in for Part I should have 3 subparts, as mentioned in the syllabus:

- (a) Your response(s) to the reading question(s).
- (b) Your own questions/comments on the reading.
- (c) The amount of time you spent on Part I (including the time spent reading/watching).

Part II: WeBWorK (due Saturday, September 27, by 11 PM)

Click [here](#) for your WeBWorK assignment. Complete the DW 10 WeBWorK assignment.

Note on WeBWorK: While it's not due until Saturday at 11, it's a good idea to do it earlier as part of your review for Wednesday's Celebration of Learning.

Part III: Homework Problems (due Wednesday, September 24 at the beginning of class)

No new Part III problems today. Just turn in the Part III problems from Daily Works 8 and 9 on Wednesday before the Celebration of Learning.
